

Station 2

Level (a)

Name the shapes you can see on the building in front of you.

How many edges can you find?

Level (b)

What types of triangles can you see?

What types of lines can you see?

Level (c)

The blue triangles on the building in front of you are congruent to each other.

What does the word 'Congruent' mean?

How would you show that two triangles are congruent to each other?
